## Introduction

Color and shapes make up the world we live in. Children and adults alike can find hours and hours of enjoyment by contributing to the world with drawings and paintings - creating a fun, as well as educational, pastime for the whole family. Art can make a rainy day inside fly by or a hard day at school or work be forgotten.

With only a pencil, paper, and this book, anyone can learn to draw effortless animals, people, and 3-D objects. The steps are designed to be easy to follow and understand. You can combine these animals, people, and shapes into entire pictures full of life and action. Useful information on color and color mixtures is also included.

If you would like to print this book, choose Print from the File menu. You can then choose "Pages From" to specify certain pages to print, or "All" to print the whole book.

Have fun!

## **What You Need**

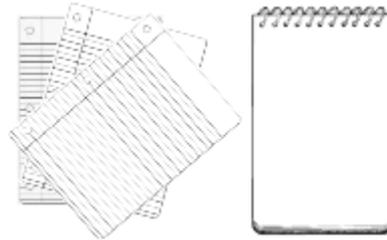

A Pencil

An Eraser

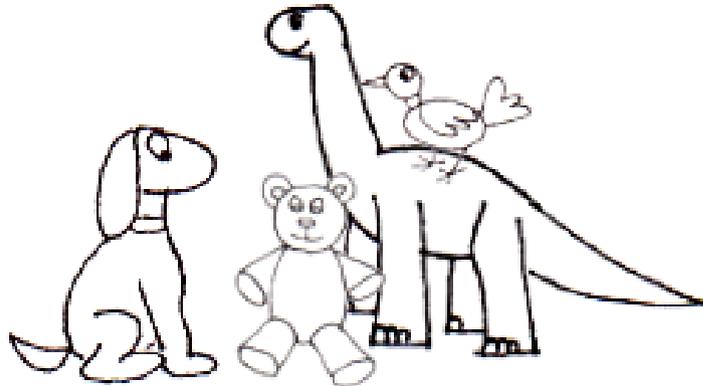

Paper or a Notebook

## Animals

## Instructions

Each animal has 8 easy steps to follow. Start with step 1, and then add each new element in the next step. After 8 steps, you have a whole animal! Whenever you see a little pink eraser, it means that you erase lines instead of draw them in that step. After your animal is done, you can color it in, mix it with other animals, or anything else you want. **(Some content not included in sample.)**

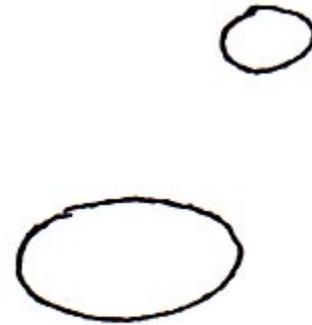

## Dinosaur

Erase! 

## People

## Instructions

Each person has only four steps, and you will learn how to draw people in different positions – sitting, standing, walking, and jumping. Start with step 1, and then add each new element in the next step. **(Some content not included in sample.)**

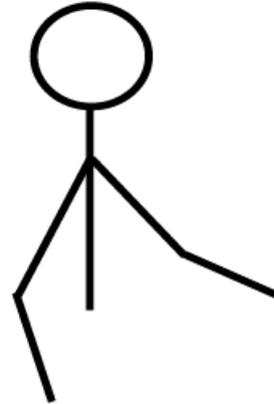

## Walking
