

## ● RECOMP DIGITAL INCREMENTAL PLOTTER

- *Plots RECOMP output at 200 increments/second*

This digital high-speed X-Y plotter presents the RECOMP user with immediate plots of computer output.. data in graph format for quick and easy interpretation.

The unit can handle any analytical or discontinuous function found in scientific and business applications. It plots one variable against another in 1/100th-inch increments, with the ability to move in eight directions. A library of subroutines is available to handle zero position and scaling problems.

Versatile, accurate, and easy-to-operate—the RECOMP precision plotter reduces man-hours . . . eliminates human error . . . provides added tools for problem analysis, and efficient, fast means of graphic demonstration.

## *features...*

- 0.01-INCH RESOLUTION
- 200 INCREMENTS PER SECOND
- SOLENOID-OPERATED PEN
- VARICOLORED INTERCHANGEABLE BALLPOINTS
- CONVENIENT ROLL PAPER FEED
- COMPLETELY TRANSISTORIZED CIRCUITRY
- SELF-CONTAINED POWER SUPPLY
- FULL-VIEW WRITING PANEL
- IMMEDIATE PLUG-IN USE

---

## *typical applications...*

Fourier Analysis  
Cut and Fill  
Production Studies  
Calibration Curves  
Medical Research  
Stress-Strain Diagrams  
Learning Curves  
Harmonic Analysis

Meteorological Studies  
Antenna Patterns  
General Forecasts  
Numerical Control  
Sales Research  
Engine Response Data  
Chemical Analyses  
Heat Transfer

Inventory  
Transducer Response  
Budgets  
Ray Tracing  
Telemetry  
Meter Monitoring  
Water Profiles  
Photogrammetry

---

## *specifications...*

Speed: X-Axis 200 increments per second maximum  
Y-Axis 200 increments per second maximum  
Z-Axis 10 operations per second maximum

Power: 125 watts at 115 volts ac

Weight: 40 pounds

Size: Approximately 12 inches high, 18 inches wide, and 14 inches deep
