Subj: DECwest status

Sue,

You should probably distribute this to the MSB staff.

An announcement at DECwest is being made today (at this moment, as a matter of fact) to the effect that...

- a. the hardware engineering function at DECwest is being discontinued, effective asap
- b. the Moraine development effort will be transitioned to the East Coast MSB groups, also asap
- c. more detail with re both development and people transition plans will be available within a day or two

Additional details will be forwarded as soon as they become (reliably) available.

Dick
