

Authors

Herbert B. Bebb

B.S. in Physics, 1959, University of Oklahoma. Joined IBM in 1959 at the Federal Systems Division Laboratory in Kingston. Now at the Thomas J. Watson Research Center, working in optical physics. Member of Sigma Pi Sigma, Pi Mu Epsilon, Mathematical Association of America, Optical Society of America and American Physical Society.

Paul E. Boudreau

B.S., 1953, University of Vermont; M.S. in Mathematics, 1958, University of Rochester. Joined IBM as a mathematician-programmer in 1958 at the Product Development Laboratory in Endicott. Currently doing graduate work in mathematics at the University of Michigan. Member of American Mathematical Association, Phi Beta Kappa, and Kappa Delta Pi.

Hsu Chang

B.S., National Taiwan University, China, 1953; M.S., 1957; Ph.D. in Electrical Engineering, Carnegie Institute of Technology, 1959. Was Teaching Assistant at National Taiwan University 1954-55. Joined IBM in 1959 at the Poughkeepsie Research Laboratory. Has been working on thin ferromagnetic films and electromagnetic fields in magnetic materials and is presently located at the Thomas J. Watson Research Center, Yorktown Heights. Member of IRE, Sigma Xi and Phi Kappa Phi.

James F. Freedman

B.E. in Metallurgy, 1955; M.E. in Physical Metallurgy, 1956; D.Eng. in Physical Metallurgy, Yale University, 1960. Joined IBM in 1959 at the Poughkeepsie Laboratory and was engaged in magnetics research. Is presently engaged in magnetic thin film research at the Thomas J. Watson Research Center, Yorktown Heights. Member of Tau Beta Pi, Sigma Xi, American Society of Metals, and American Institute of Metallurgical Engineers.

John S. Griffin, Jr.

B.S. in Physics, 1950, Alabama Polytechnic Institute; Ph.D. in Mathematics, 1955, Tulane University. Instructor of Mathematics at the University of Michigan, 1955-59. From 1959 to present, staff mathematician at the General Products Division Development Laboratory at Endicott. Member of American Mathematical Society, Institute of Radio Engineers and Sigma Xi.

John W. Haskell

B.S.E.E., 1951, Purdue University. Worked on electronics development for the Eastman Kodak Company, 1951-53. From 1953-56 employed by General Electric Company in missile fuse development. 1956-59, General Motors Corporation, in electronics. Joined IBM at the General

Products Division Development Laboratory at Endicott; main interest is development of non-mechanical memories. Member of Eta Kappa Nu and Institute of Radio Engineers.

Charles Hays

B.S. in Metallurgical Engineering, 1958, University of Kentucky. Joined IBM Electric Typewriter Division in 1960; now associate metallurgist at the Electric Typewriter Development Laboratory. Previous experience in metals research includes association with Kentucky Research Foundation, The Oak Ridge National Laboratory and Atomics International, Inc. Now at Aerospace Corporation, Los Angeles, California. Member of American Society for Metals.

John Wesley Horton

B.S. in Physics summa cum laude, Brown University, 1947; M.A. in Physics, Princeton University, 1949; Ph.D. in Physics, Princeton University, 1953. Was Assistant in Instruction, Princeton University, 1947 to 1953. Joined IBM in 1953 as member of technical staff at the IBM Watson Scientific Computing Laboratory. Research fields: meteorology, radar, nuclear physics, nuclear magnetic resonance and semiconductor electron devices. Is presently engaged in electro-optics and laser research at the IBM Advanced Systems Development Laboratory, Yorktown Heights. Member Sigma Xi and American Physical Society.

Mark Kac

Ph.D., 1937, John Casimir University, Lwow, Poland. Joined Cornell Faculty in 1939, becoming Professor of Mathematics in 1947. Accepted a Professorship at the Rockefeller Institute in 1961. Has been consultant to IBM, General Products Division, Endicott, since 1959.

Martin A. Leibowitz

A.B. with Highest Honors, Columbia College, 1956; A.M., 1957; Ph.D., Harvard University, 1961. Was Research Assistant at Harvard University from 1957 to 1960. Joined IBM in 1960 at the Ossining Laboratory in the Advanced Systems Development Division. Is presently studying statistical problems associated with large-scale communication systems at the Thomas J. Watson Research Laboratory, Yorktown Heights. Member of Phi Beta Kappa.

Joseph T. S. Ma

B.S., 1956, National Sun-Yat-sen University; M.S., 1951, Purdue University; Ph.D., 1959, Iowa State University. From 1951-53, worked in power plant design for Lubbock Municipal Power Company. Instructor and Assistant Professor at Iowa State University, 1953-59. Joined the IBM Research Laboratory at San Jose in 1959. Member, American Society of Mechanical Engineers.

Simon Middelhoek

M.S. in Physical Engineering, Technical University of Delft, Holland, 1956; Ph.D. in Physics, University of Amsterdam, 1961. Assistant in Physics, 1953-1956. Joined IBM in 1956 as Physicist in the Research Laboratory, Zurich, and is working on a temporary assignment at the Thomas J. Watson Research Laboratory, Yorktown Heights. His present field of interest is ferromagnetic domains in thin Ni-Fe films. Member of the Dutch Physical Society, Royal Institute of Engineers, and the German Study Group on Ferromagnetism.

William L. Mitchell

B.S., 1953; M.S., 1956; Engr. D. in Metallurgical Engineering, 1958, University of Kentucky. Joined IBM Electric Typewriter Division in 1958 as associate metallurgist in the Electric Typewriter Development Laboratory. Now manager of Materials Engineering Laboratory. Previous experience includes two years' association with the DuPont de Nemours & Company, Inc. at the Savannah River Laboratory in Augusta, Georgia. Member of American Society for Metals, Tau Beta Pi and Sigma Xi.

Armin P. Segmüller

M.S. in Physics, 1950, Ph.D. in Mineralogy, 1954, University of Erlangen, Germany. From 1950 to 1954 Dr. Segmüller worked on preferred orientation of thin evaporated films. From 1954 to 1959 he taught x-ray crystallography and metallurgy and x-ray diffraction studies of martensitic transformation and of preferred orientation in metals at the Department of Metallurgy, Bergakademie (Institute of Technology) Clausthal, Germany. Joined IBM in 1959 as physicist and metallurgist in the thin films physics group of the Research Laboratory, Zurich, and is engaged in studies of magnetic annealing and structure

investigations on thin films. Member of the German Physical Society and of the German Metallurgical Society.

Roy E. Swift

B.S. in E.M., 1934, Missouri School of Mines and Metallurgy; M.S. in E.M., 1940, University of Washington; M.S. in Met. Eng., 1945, University of Utah; D.Eng., 1949, Yale University. Formerly with the metals industries, U.S. Bureau of Mines, Battelle Memorial Institute, Louisiana State University, University of Alaska, Purdue University, and the University of Nevada. Since 1951 an Associate Professor and from 1956 to present Professor of Metallurgical Engineering at the University of Kentucky. Member of American Society for Metals; American Institute of Mining, Metallurgical, and Petroleum Engineers; Nuclear Division of the American Institute of Chemical Engineers, American Society of Engineering Education, Kentucky Society of Professional Engineers, Sigma Xi, Sigma Gamma Epsilon, Alpha Sigma Mu, and Alpha Chi Sigma.

Paul K. C. Wang

B.S., 1955, M.S., 1956, California Institute of Technology; Ph.D. in Electrical Engineering, 1959, University of California. Joined the IBM Research Laboratory at San Jose in 1959; working in control systems research. Member of American Institute of Electrical Engineers and Institute of Radio Engineers.

Shmuel Winograd

B.S. and M.S. in Electrical Engineering, Massachusetts Institute of Technology, 1959. Joined IBM in 1961 at the Thomas J. Watson Research Center, Yorktown Heights. Is presently working on reliability problems in the automata and computability group.

Contents of previous three issues

January 1962

Vol. 6, No. 1

● Articles on Superconductivity:

Review of the Present Status of the Theory of Superconductivity
by *J. Bardeen* 3-11

On the Influence of Free Path on the Meissner Effect
by *K. U. von Hagenow and H. Koppe* 12-13

Solutions of the BCS Integral Equation and Deviations from the Law of Corresponding States*
by *J. C. Swihart* 14-23

Nuclear Spin Relaxation in Superconducting Cadmium
by *Y. Masuda* 24-26

Experimental Work on Superconductivity
by *K. Mendelssohn* 27-30

The Kapitza Resistance of Metals in the Normal and Superconducting States
by *W. A. Little* 31-33

Superconductivity and Electron Tunneling
by *S. Shapiro, P. H. Smith, J. Nicol, J. L. Miles and P. F. Strong* 34-43

Magnetic Field Dependence of the Superconducting Energy Gap in Ginzburg-Landau Theory with Application to Al
by *D. H. Douglass, Jr.* 44-48

Dependence of the Energy Gap in Superconductors on Position and Magnetic Field
by *M. Tinkham* 49-54

Far-Infrared Absorption in a Lead-Thallium Superconducting Alloy
by *D. M. Ginsberg and J. D. Leslie* 55-57

Ultrasonic Attenuation in Superconductors
by *R. W. Morse* 58-62

The Magnetic Behavior of Superconductors of Negative Surface Energy
by *B. B. Goodman* 63-67

Effects of Electron Concentration and Mean Free Path on the Superconducting Behavior of Alloys
by *B. R. Coles* 68-70

Surface Energy Effects at the Boundary Between a Superconductor and a Normal Conductor
by *H. Meissner* 71-74

Some Elementary Theoretical Considerations Concerning Superconductivity of Superimposed Metallic Films
by *L. N. Cooper* 75-76

January 1962 (cont'd)

Thermodynamic Consistency of Magnetic and Calorimetric Measurements on Superconductors
by *D. E. Mapother* 77-81

The Temperature and Pressure Dependence of Critical Field Curves
by *C. A. Swenson* 82-83

Mechanical Effects at the Superconducting Transition
by *K. Andres, J. L. Olsen and H. Rohrer* 84-88

Variation of the Elastic Moduli at the Superconducting Transition
by *G. A. Alers and D. L. Waldorf* 89-93

First- and Second-Order Stress Effects on the Superconducting Transitions of Tantalum and Tin
by *D. P. Seraphim and P. M. Marcus* 94-111

Thermal Conductivity of Dilute Indium-Mercury Superconducting Alloys
by *G. K. Chang, R. E. Jones and A. M. Toxen* 112-115

The Superconductivity of Some Intermetallic Compounds
by *R. D. Blaugher, A. Taylor and J. K. Hulm* 116-118

High-Field Superconductivity in Some bcc Ti-Mo and Nb-Zr Alloys
by *R. R. Hake, T. G. Berlincourt and D. H. Leslie* 119-121

Anomalous Resistive Transitions and New Phenomena in Hard Superconductors
by *M. A. R. Le Blanc* 122-125

● Regular Article:
Associative Memory with Ordered Retrieval
by *R. R. Seeber and A. B. Lindquist* 126-136

● Letters to the Editor:
Dual Programs
by *P. Huard* 137-139

Domain Wall Creeping in Thin Permalloy Films
by *S. Middelhoek* 140-141

April 1962

Vol. 6, No. 2

● Regular Articles:
Some New High-Speed Tunnel-Diode Logic Circuits
by *M. S. Axelrod, A. S. Farber and D. E. Rosenheim* 158-169

Characterization of Tunnel Diode Performance in Terms of Device Figure of Merit and Circuit Time Constant
by *L. Esaki* 170-178
