

- NOTES
- 1) The termination reference drives 330 ohm isolation resistors to these S-100 bus pins: 4 through 19, 21 through 49, 56 through 69, 70 through 74, 76 through 99.
 - 2) IEEE 696 compliance: Cut trace at U6-8 and install two new components as shown.
 - 3) Numbered references are for the S-100 bus connectors.
 - 4) The power supply ports labeled +15V and -15V are the PS-28 +18V and -18V supply voltages respectively.
 - 5) J1 supplies DC power to the system's CRT and floppy drives.
 - 6) The switch and lamp components drawn to the left of J2 are part of the system front panel wiring harness.
