PHILCO 4000 SERIES PRINTER
300 Lines Per Minute

The 300 line per minute Printer is used to produce high-quality printed output from the Philco 4000. Sixty-three Philco characters plus a blank column may be printed on continuous forms up to 20 inches in width. The Printer can be connected to any channel of the Philco 4000.

SPEED

- Prints at the rate of 300 lines per minute.

- Skips at the rate of 6,000 lines per minute.

PRINTING

- Produces up to 6 clearly printed single or multiple forms.

- Prints up to 120 characters per line.

- Prints 10 characters per horizontal inch, 6 or 8 lines per vertical inch.

- Prints 63 different characters plus a blank column.

PAPER SIZES

- Accepts paper up to 20 inches wide with no limit on form length.

TYPE STYLES

- Type faces are interchangeable.

PROGRAMMING FEATURES

Accepts instructions from the Philco 4000 as follows:

- Connect – Electronically connects the Philco 4000 Central Processor to the Printer. This reserves the Printer for use with the Central Processor.
- Print – Causes a line of up to 120 characters to be printed.
- Page – Advances the paper to the first line of the next form.
- Space – Advances the paper the number of lines specified.
- Line – Advances the paper to the line specified.
- Disconnect – Disconnects the Central Processor from the Printer. This permits the Printer to accept another Connect instruction.
