

# HP SmartStart Scripting Toolkit Linux and Win32 Editions

## Support Matrix

The Linux and Win32 editions of the SmartStart Scripting Toolkit provide a collection of tools that assist with configuring HP ProLiant server hardware and installing your operating system.

## Hardware Support

The following tables list the HP servers that are supported by the Linux and Win32 editions of the SmartStart Scripting Toolkit. While all toolkit utilities except for the Configuration Replication (CONREP) utility should run on all unsupported servers, the utilities have been tested only on the servers listed in Table 1, Table 2, and Table 3. Table 4 lists the Remote Insight options that are supported by the toolkits.

**NOTE:** Embedded LSI ATA RAID controllers in the HP ProLiant DL320 G2, ML330 G2, ML310, and ML330 G3 servers are not currently supported by the Linux and Win32 editions of the SmartStart Scripting Toolkit and must be configured manually. They will be supported in a future release of the toolkit.
