

**RF(IV)**

**RF(IV)**

**NAME**

rf – RF11/RS11 fixed-head disk file

**DESCRIPTION**

This file refers to the concatenation of all RS-11 disks.

Each disk contains 1024 256-word blocks. The length of the combined RF file is  $1024 \times (\text{minor} + 1)$  blocks.

The *rf0* file accesses the disk via the system's normal buffering mechanism and may be read and written without regard to physical disk records. For the equivalent of "raw" I/O see the *setio* command.

**FILES**

/dev/rf0
